

RIBELLE® RUN XT & RIBELLE® RUN XT^{WMN} 33082/351 & 352

PRODUCT POSITIONING

Versatility meets durability in the Ribelle® Run XT, intended for rugged terrain when extra support and protection is needed. A full perimeter rand and an extended toe bumper deliver protection in spades, while the recycled fabric upper is armored with TPU overlays to ensure total foot security and stability. The PRESA® outsole with its enhanced forward heel brake delivers outstanding traction and confident strides on any trail.

M 33082/351

W 33082/352

FEATURES AND BENEFITS

- 01** **Recycled Upper:** Durable upper fabric with 60% recycled content and welded TPU overlays add protection, structure and stability
- 02** **EXO Construction:** Provides sustainable support
- 03** **Full Perimeter Rand:** Climbing inspired TPU rand encircles the perimeter of the shoe providing 360 degree support and protection.
- 04** **Midsole:** EVA midsole is overlasted for durability and protection
- 05** **Outsole:** PRESA® outsole with Extended Toe Bumper wraps up in front of the toes, adding additional protection

SPECIFICATIONS

- Upper: Mesh + PU + TPU - **60% Recycled**
- Lining: Stretch Textile
- Insole: Strobel + Nylon Insert
- Midsole: 2D EVA (6mm Drop)
- Outsole: PRESA® TRN-05 / SuperGum
- Last: Men's - ARSF
Women's - ARSFW
- Sizes: Men's - 40-47 (½ sizes); 48 (whole sizes)
Women's - 36-42 (½ sizes)
- Weight: Men's - 355g; 12.5oz (½ pair, size 42)
Women's - 295g; 10.4oz (½ pair size 38)
- Origin: Vietnam

TECHNOLOGIES

RIBELLE® RUN XT & RIBELLE® RUN XT^{WMN} 33082/351 & 352**TECHNOLOGY - MATERIALS - CONSTRUCTION**

Full Perimeter Rand – Inspired by our expertise in climbing and approach shoes, the midsole and upper of the Ribelle® Run are fully integrated by a tensioned TPU rand that completely encircles the shoe, providing 360 degrees of support and protection. This rand construction gives the shoe a very precise fit and feel, making it ideal for technical, rocky terrain where precision foot placements are a must. The rand also provides additional structure to the upper for improved lateral support, and a high level of protection from abrasion.

PRESA® TRN-05 Outsole – SCARPA's expertise is readily evident in our proprietary PRESA outsole collection, born from 80+ years of footwear design expertise and craftsmanship. PRESA outsoles are purpose-designed specifically for each product by SCARPA's expert technicians, and rigorously tested in the field to ensure they meet our performance requirements. Careful lug design and placement ensures optimizes traction and performance while minimizing weight. The TRN-05 outsole features a well defined forward heel brake, with larger 4.5-5mm deep lugs to ensure stability and traction on more rugged terrain.

ATR Gum Rubber – Exclusive to SCARPA, the ATR Gum rubber compound was developed to provide the optimal blend of durability, friction and traction. It was formulated to deliver great friction performance in both wet and dry conditions, but at the same time offers outstanding durability for harsh terrain. ATR Gum rubber is the ideal rubber compound for the Ribelle Run XT.

EXO Construction – Highly breathable upper mesh is backed by our EXO internal support matrix, inspired by structural elements of the Golden Gate bridge. Welded PU reinforcements on the upper add additional structure, support and abrasion resistance.

SCARPA Planet Friendly – Our products tread the most wonderful and unspoiled landscapes on earth. We feel we must do our best to preserve these landscapes. "Planet Friendly", products made of environment-friendly materials refer to products in which materials and processes are specifically chosen for their environmentally friendly characteristics.

FIT:
ARSF last. Medium minus heel and midfoot fit, with a slightly narrow, lower volume forefoot. A more precise fit for running in technical, rocky terrain or scrambling.
