

# MESCALITO & MESCALITO<sup>WMN</sup>

## 72103/350 & 352

### PRODUCT POSITIONING

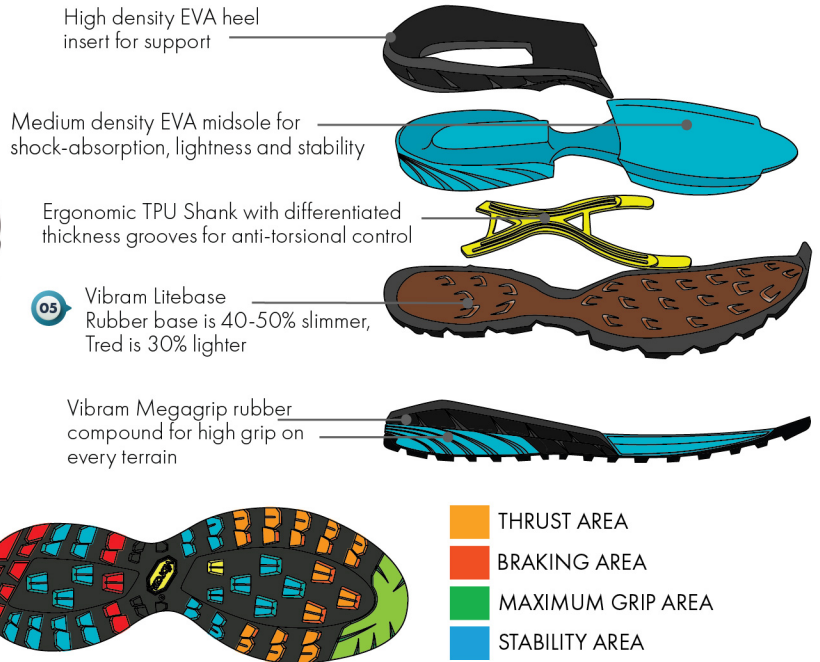

The Mescalito is a premium approach shoe designed for technical hikes into remote alpine objectives. Its burly, 1.8mm suede upper is both water-resistant, extremely abrasion resistant, and incorporates lace-to-toe closure for ultimate adjustability. A sticky rubber toe rand provides excellent friction when the going gets technical while the dual-density EVA midsole can handle heavy loads and long approaches. The Vibram MegaGrip outsole with LiteBase technology is super sticky and also features a climbing zone for when approaches get more scrambly. The Mescalito is the ultimate combination of durability and lightweight performance.

**M** 72103/350

**W** 72103/352

### FEATURES AND BENEFITS

- 01 Suede Upper:** Durable, water-resistant 1.8mm suede upper can handle the harshest alpine conditions and is also extremely abrasion resistant
- 02 Rubber Rand:** A sticky rubber toe rand provides excellent grip when the going gets technical. *Made from 20% recycled rubber from production waste*
- 03 Lacing:** Full length lace-to-toe closure system allows for a dialed in precision fit when the terrain gets technical
- 04 Midsole:** Dual density midsole provides a perfect balance between cushion and support for carrying loads over long distances
- 05 Vibram® Litebase:** reduces the weight of the sole through reduction in thickness of rubber bottom, while keeping the layout and shape unchanged thus maintaining the same level of performance.

### SPECIFICATIONS

- Upper: 1.8mm Suede & Polyester Mesh
- Lining: Stretch Textile + 37.5® by Cocona
- Insole: Strobel
- Midsole: EVA
- Outsole: Vibram® Dynamis LB / Megagrip
- Last: Men's - BNN  
Women's - BNN
- Sizes: Men's - 40-46 (½ sizes); 47-48 (whole sizes)  
Women's - 36-42 (½ sizes)
- Weight: Men's - 400g; 14.1 oz (½ pair, size 42)  
Women's - 330g; 11.6oz (½ pair size 38)
- Origin: Serbia

### TECHNOLOGIES

## TECHNOLOGY - MATERIALS - CONSTRUCTION

**Vibram® Litebase** – Vibram Litebase is an innovative technology studied to drastically reduce the weight of the sole through the reduction in the thickness of the rubber bottom, while keeping the layout and the shape of the lugs unchanged, thus maintaining the same levels of performance. Vibram Litebase allows for a reduction of about 40-50% in thickness, from 1.7mm to 0.5/0.9mm depending on the sole, with a consequent reduction in the weight of the read of 25%-30%. The substantial reduction of the thickness of the rubber bottom does not affect the sole nor the risk of laceration. The result is a very light sole, with patterns identical to those of traditional Vibram sole and therefore with the same characteristics of traction, duration and wear resistance.

**Vibram® Megagrip** – Developed for the user who frequently encounters slippery surfaces, VIBRAM® Megagrip is suitable for trekking, multisport, fly fishing, as well as all season hiking and travel. It offers an incomparable combination of grip and durability which helps define VIBRAM® Megagrip as the ideal high performance rubber compound for extremely demanding activities such as backpacking, canyoneering and enduro-mountain biking.

**37.5® Technology** – 37.5® Technology is a dynamic thermoregulation technology that triggers off of humidity. Humidity is the gauge for weather you are hot, active particles embedded into the material use your body's energy to remove moisture and cool you down. When you're cold, the active particles retain the body's energy to warm you up.

**SCARPA Planet Friendly** – Our products tread the most wonderful and unspoiled landscapes on earth. We feel we must do our best to preserve these landscapes. "Planet Friendly", products made of environment-friendly materials refer to products in which materials and processes are specifically chosen for their environmentally friendly characteristics.

## ACTIVfit SYSTEM

**ACTIVfit Technology** – ACTIVfit is a construction system that employs different last shapes, material combinations and construction techniques to provide the optimal fit and performance for the intended activity.

**Last /Fit Description** - SHT last / developed for a dynamic, performance fit for light weight trail products, this very accommodating last features a medium width heel and midfoot with a slightly roomier toebox and more pronounced toe rocker profile, giving all-day comfort and a more efficient toe-off during the stride.
